

Year 4 learning tasks wb: 13.7.20

Happy Monday!

I hope you are all keeping well. By now you will already know that I am going to be your Year 5 teacher in September. I am so pleased to be continuing our learning journey together and can't wait to see you all again. We have lots of great learning opportunities to look forward to. I am really happy to tell you that Mrs. Boost will be joining us during the mornings, in Year 5.

For now though, here are some activities you can do at home:

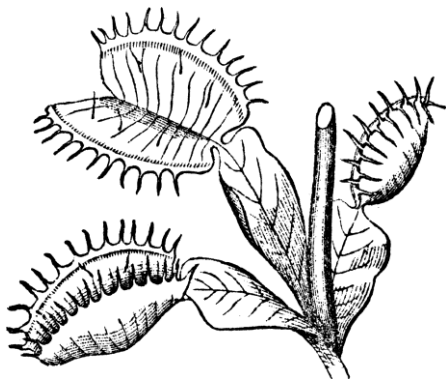

English – you have now been on the island for some time and you will be familiar with life and how to look after yourself. Imagine you see a boat in the distance. What are you going to do? Will you try to attract the boat to the island to rescue you? Or will you think twice, as you have survived on the island successfully and you may want to stay there.

Draw up a list of positive/negative things about the island and compare those things to your life back at home. What things have you missed? What things are better on the island? Explain why you might want to stay on the island or why you want to go home. Would the island be a good place to live if you had others living with you? Explain why.

On the island you have found a map and if you follow it you will come to a place where a treasure chest is buried. You dig up the treasure chest and find wonderful things inside. What do you find inside? Sketch the treasure chest and the things you have found inside. How are you going to use the things inside? What will you do with them?

Maths – White Rose Maths home learning.

Topic – Think about the rainforest. You have been sketching and researching rainforest animals. Now think about the plants that grow among the different layers of the rainforest.

Venus Fly Trap

Rainforest Ferns

Art – Draw a member of your family (or yourself) as a cartoon/caricature character or choose a famous person.
